DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 4, 6, 7, 10, 12 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the phrase "a supporting film formed on at least one of the upper and lower surface of the second insulating film" is unclear since in the specification (page 41, lines 6-9 and figure 5) described the supporting film 17 is between a first insulating film 16 and a second insulating film 23. Therefore, there is no supporting film formed on at least one of the upper of the second insulating film.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1, 4, 6, 7, 10, 12, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee [U.S. Pat. 5,936,272].

Lee (figure 4, cols. 7-10) discloses a semiconductor device comprising:

- a gate (70) on a substrate (100);
- an impurity diffusion layer (118, 119) in a region sideways of the gate;
- an interlayer insulating film (125, BPSG) formed on the gate;
- a supporting film (135, O₃-TEOS) formed on the interlayer insulating film;
- an etching stop film (136, silicon nitride) formed on the supporting film;
- a cylindrical storage node (140, 160) filling an opening formed in the interlayer insulating film and extending over a part of the interlayer insulating film;
- a capacitor insulating film and a plate electrode formed for coverage over the storage node (see col.10, lines 1-4)

Art Unit: 2814

Lee does not show a capacitor insulating film and a plate electrode formed for coverage over the interlayer insulating film. However, a capacitor insulating film and a plate electrode formed for coverage over the interlayer insulating film are well-known to those skilled in the art.
